These applications are classified into several categories: Top Developer – Selected developers with more than 200 published applications Middle Developer – Selected developers with 100–200 published applications Small Developer – Selected developers with less than 100 published applications Developers can also sign-up to become a Public Developer. Public developers may publish their own applications as well as make available for use within their applications. Applications developed in this way can be downloaded by all users of the application or only those that use the application to which the author has granted access. Most software applications available on the Autodesk Exchange Application Platform can be purchased from the Autodesk Exchange store. The software can be made available to the public at a discounted price. It is not necessary to register with Autodesk Exchange to download applications.
