We are offering an interesting range of tasks with attractive development opportunities in a friendly working environment.

Your tasks:

- Responsible product control within the scope of product release
- Control and maintenance of laboratory equipment
- Assessment of error sources and participation in the development of corrective measures
- Continuous development and improvement of our quality processes

Your qualification:

- Completed apprenticeship as chemical laboratory assistant, CTA / BTA / PTA / MTA or Bachelor (chemistry, biology, pharmacy)
- Experience in an analytical laboratory, ideally in clinical diagnostics
- Profound knowledge in the sector of instrumental analytics, in particular HPLC and LC-MS/MS
- Confident handling of the common EDP programmes
- Meticulous working method and accurate documentation

If we have attracted your attention and you are interested in a position with varied tasks in an aspiring company, please send your detailed application documents indicating your salary expectations and earliest entry date
