Version: 1.1.7. Comparative study of
allogenic and xenogenic blood
transfusions for orthotopic liver
transplantation: results of a
randomized trial. In an attempt to
prevent the risk of sensitization
toward human leukocyte antigens,
we have performed a comparative
study of the effect of allogenic and

xenogenic blood transfusions during orthotopic liver transplantation. We randomized 45 patients into two groups: group A, the patients were given homologous blood transfusions, and group B, the patients were given heterologous blood transfusions. The decrease in portal venous pressure, as measured by the pressure of the superior mesenteric artery, was not different in the two groups. Similarly, the postoperative biopsy score, as determined by the Severance classification of hepatic fibrosis, was not different in the two groups. However, all cases of acute rejection were in group A. The level of antibody formation was not different between the two groups. In conclusion, allogenic blood transfusion during orthotopic liver transplantation did not provide

more benefit than a heterologous transfusion. Follow Us More

First appearing in Catwoman #1 in 2013, Tiffany Grant will star in the first feature-length film in a new, ongoing featurette titled, "Batgirl.""

Batgirl will feature Tara Strong, who will play Barbara Gordon in the film. She's the character's voice as Oracle, the computer program she uses to communicate with Batman and other superheroes. "Cathy Yan is a visionary filmmaker who

promises to bring 'Batgirl' to life on the big screen the same way the character is brought to life in the pages of DC Comics," said Sarah Schechter, WB Co-President and Chief Content Officer. "We can't wait to bring 'Batgirl' to life in the timeline of the DC universe, where she will be joined by Cyborg
