Elements with checkbox: After the query is called I need something like: XDocument xdoc = XDocument.Load("test.xml"); var queryResult = from tag in xdoc.Descendants("Checkbox") where tag.Element("label") == "Y" select tag; var queryResult2 = xdoc.Descendants("Checkbox"); xdoc.AppendChild(queryResult); Current Output: Desired Output: Does anybody have an idea how to add the queryResult in the child document? A: To build a list from queries, you can use Linq-to-XML: List allCheckboxes = from cb in xdoc.Descendants("Checkbox") where (string)cb.Element("label") == "Y" select cb; If you can run this kind of query during your program's lifetime, you can just directly populate a
