As quickly as the first half of the game starts it all comes to a halt. Gamers will have to deal with the previous chapters before they try to figure out the new storyline. This is not a good thing. The storyline is very difficult to understand and sometimes there are no subtitles for English or Norwegian gamers. (The virtual CD is the only form of instruction) The puzzle are frequent. These puzzles are often very difficult as they require critical thinking. As a result, it will be very difficult for gamers to play properly. AI is human-like, but can often make very stupid or unrealistic decisions. The movement systems are good but could not be better. Game is easy to play but difficult to master. Story and characters: 7/10 (HEGIS THE PIRATE ATTRIBUTES) Characters (HEGIS THE PIRATE) were not very interesting as the characters were not developed with any depth. I was hoping for something more as it was not enough to just a backstory of your ancestor. Story: 3/10 (SIGNS) We are in 2008. A nuclear reactor at a scientific institution has been closed and moved to a second location and the participants are sent to this newly constructed site. The station is allegedly owned by a private joint-stock company. The game starts with Hegis the Pirate who seems to be a character of the popular game title "Slender Man". It is impossible to tell what his motives are for opening the channel and messing up the power. Characters: 3/10 (AGATHA AND GAUTAM) I don't remember playing any of these characters. Story: 5/10 (THE MUTANTS) The journey starts with the discovery of "the strange organism" and the museum where it is stored. What was once a secret is now a full public display. The government wants to investigate and have the specimen to be the first to detect new mutants. There are many tests as the organisms are very harmful to humans. During this journey the player will encounter many mutants. As the story progresses, it becomes apparent that the government and the specimen are part of a bigger conspiracy. Characters: 3/10 (HERMIONE) The character of Hermione was very believable and attractive. Being familiar with her

previous adventures she still kept her charisma. Story: 3/10 (THE COLOSSUS) As a character he was very uninteresting

What's new in Hegis' Grasp: Evil Resurrected:

? Good news. Bad news. If you cast Bane on a creature that's already under the Restrained condition (lets call them "Grasping-Vicious" creatures here), it will still be restrained, but you won't be able to squeeze more damage onto them. If you cast Bane on a creature that's already under the Restrained condition (lets call them "Grasping-Vicious" creatures here), it will still be restrained, but you won't be able to squeeze more damage onto them. I don't think any of the proxies have this ability, or have anything in their sets that let us attach???(#) to their Restrained conditions. This is about as awesome as it gets for Bane, and I wish it had potential to work with all sorts of scary things. Example: Say target enemy has the plaguing ability. Cast Bane on him, then insert the???(#) token, making it a???(#) token. Call a swarm of insects to attack, killing both of them. Bane's Soul Kit is one of the best abilities in the set, and now it also has one of the most powerful templates ever. Problem is, activation is a bit expensive. Not active, but can be triggered when a creature is killed Not active, but can be triggered when a creature is hit Unable to be activated any time we play a card, including triggered abilities Heavily pushed into the game by Gloom (who has... a lot of ways to do the same thing), but still not always a killer Heavily pushed into the game by Gloom (who has... a lot of ways to do the same thing), but still not always a killer As such, the card access to a way to kill someone (ie: 20 point damage from Killemall) outweigh the benefits. So, what gives? Is it overpowered? I wouldn't say that. It's a very good ability to pull out in certain situations. What it does do is push out the problem cards, even those from Shadowspear ("This makes me question the work I've put into this deck. I am at a disadvantage here. My way of winning is ruined."), Blight ("As if I need this..."), Otherworld Champion ("Still not enough
