Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. The navigation of the videogame is made by simply left and right buttons, and it is with this one that he can change between rooms, events and activities. Eventually the player can find an animal and this is where the game begins. That's why for the first time, he needs to explore his world. He has to go over its every corner in order to find something, to collect some materials, to find a user and to hack him, but also to play with his friends. To play with his friends, the player needs to enter in one of the rooms, and he can find there all the users. He will be able to add him to his friendlist, chatting with him and sharing his achievements. The game will present a window where the player must do what his
