Love in a different way! Eden Weaver is a bounty hunter. She is responsible for executing dangerous felons like drug dealers, serial killers and gangs from the streets to the courts. Then she meets a man and they both become targets for the government. You have to escape together to the safe zone, but there is no guarantee that you will both survive. And when you are caught, you will have to decide: will you kill him or not? The game is separated into several areas. In the city you will find the safe house, the jail, the patrol officer and other people. In the forest there is the giant tower with no exit, the fields with animals, the mines and the cave. In the street there are enemies, looters and the safe house and the hotel you start the game. Hints: Play as a lover. Try not to shoot at people, hurt them or shoot them into the air, because they will return and hurt you and your lover. Try to shoot a guy and run away, they will follow you. The shooting

hand/hand cover will regenerate as long as you do not hit anyone. The game offers three weapons. Each of them has a weak and a strong mode. The "easy" mode can be used at the beginning, the "normal" and the "hard" mode is for a more advanced level. More weapons, more enemies. Most mobs are weak, but the enemy can be a little stronger. If you are killed, you can't go to the market to buy a health potion/herb. You have to try to get to the safehouse to heal yourself. The reward for completing one area is to go to the next area. \*Steam achievement and ranking \*Powervisuals \*NO in app purchases. “Stranger of Sword City, a free-to-play RPG from EA Japan's Phantasy Star Online 2 studio that launched on Steam on July 22, is an artful, fluid, and incredibly challenging dungeon crawler, focusing on combat rather than gimmicks.” 4.5/5 – RPGFan About The Game: “With fewer enemies in an isometric space, the game can have a pretty high difficulty level. However, some of the characters do give you a huge power boost during the boss fights, so you can power through it if you try.” 5/5 – BigScreenDrop Stranger of Sword City 1.0.12 has been released! Retinol and vitamin E content in erythrocytes and plasma were estimated in 30 patients with acute renal failure (ARE). ARE was detected in a pre- and post-dialytic period of the disease. Vitamin E and retinol levels were found to be reduced in patients with ARE, both in the pre- and post-dialysis period. The retinol-to-vitamin E ratio in blood of these patients is greater than the control values. That's why the home of the Chicago White Sox is the most lit place in America after 11pm, especially after the NBA playoffs conclude and the Stanley Cup finals are out of sight. Where does the White Sox's minor league park stack up? Well, the video on the left below shows you how a dark, sparsely-populated section of the U.S. may be smarter than another section of the U.S. during the playoffs. If you look at the relative darkness of that building on the left below, where over 8,500 seats have their backs to the wall and are at the mercy of the wind and other meteorological elements, then you'll understand the appeal of the random parking lot to baseball fans. In Chicago and elsewhere, if you walk into a building and you don't know what you're looking for, there's a chance you'll find it. That's why professional basketball teams are in Chicago right now: their opponent's fans don't know the territory. Fortunately for the White Sox, their roster is full of legitimate stars who are accustomed to playing in front of large, friendly crowds. In the video below, they play a version of Blindman's Bluff on the U.S. Senate lawn in Washington, D.C. Regardless of what either team does, the idea is not to think about what's going to happen. It's to be in the moment, enjoy

**Q: How do I get a custom Post Type to apply to a custom taxonomy I have a custom theme, that i'd like custom post types and taxonomies to look like. I've built the theme, the front end is just a template that I'm using to apply the same styling to the actual site. I've built the post type's and taxonomies, and I'm using add\_action to hook into the edit page:**

```
function add_custom_post_taxonomies() { $labels = array( 'name' => _x('Landor Samples', 'Add title'), 'singular_name' => _x('Sample', 'Add title'), 'menu_name' => _x('Landor Samples', 'Add title'), ); $args = array( 'labels' => $labels, 'hierarchical' => false, 'labels' => $labels, 'show_ui' => true, 'show_admin_column' => true, 'query_var' => true, 'rewrite' => array('slug' => ' '
