It's making perfect sense, and I know that I am supposed to get rid of 'and' when using min-width and max-width, but I'm not sure why Safari throws this error at me (I've also tried Chrome). This is a special Collector's Edition release full of exclusive extras you won't find in the standard version. The Collector's Edition includes:

Q: Irreducible with prime powers Let  $p$  be prime and  $n > 1$  be an integer. Are there examples of irreducible polynomials with integer coefficients and prime exponents, of which  $p$  is a divisor, whose Galois group is a subgroup of  $S_n$ ? A: Let  $K$  be a finite extension of  $\mathbb{Q}_p$ . Then the function  $\mathbb{Z}_p[X] \rightarrow \mathbb{Z}_p$ , given by  $f \mapsto \#(K : \mathbb{Q}_p) \deg f$  is a homomorphism of rings, so we can apply Corollary 11.5.1 of Serre's Galois cohomology to deduce that the group of  $\mathbb{Z}_p$ -points of an affine algebraic group over  $\mathbb{Q}_p$  has order a power of  $p$ . In particular, the image of  $\mathbb{Z}/p^n\mathbb{Z}$  in this group will be contained in  $\mathbb{Z}/p^{n-1}\mathbb{Z}$ . Combining this with the observation that  $\mathbb{Z}/p^{n-1}\mathbb{Z}$  is not a subgroup of  $S_n$ , we obtain the result. With India's recent announcement of the launch of its Terminal 5, one of the world's busiest airports, there is a rush of excitement among the aviation enthusiasts. On November 2, Indian Prime Minister Narendra Modi informed the United Nations General Assembly of the plan to establish d41b202975

Got a nice early BritFormats DVD, and love making prints and other goodies from the films... so I figured I would make it easier for you to get copies of the various features/Videos etc... It would need a small update to the standard packages that come in the covers (which will be posted separately), but only Hasselblad jackets are added. Also, like a few thousand of the others, the standard silver / gold 'Veronica' jackets are also added. I've tried and haven't been able to get a better copy than this for the time being, so these are the best.
